Investing involves risk, including the possible loss of principal. International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Narrowly focused investments may be subject to higher volatility. Preferred stock is subject to many of the risks associated with debt securities, including interest rate risk. High yielding stocks are often speculative, high risk investments. Companies may reduce or stop paying dividends at any time, which could have an adverse effect on performance.

Carefully consider the Funds' investment objectives, risk factors, charges, and expenses before investing.
