

NASDAQ Index ETFs

Global X NASDAQ 500 ETF

The Global X NASDAQ 500 ETF tracks the NASDAQ 500 Index, which is designed to measure the performance of 500 of the largest domestic and international non-financial securities listed on the NASDAQ Stock Market. The Fund provides exposure to a diverse group of industries including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. The Global X NASDAQ 500 ETF allows investors to diversify beyond the top 100 NASDAQ components and expand to a larger universe of NASDAQ listed companies.

About the NASDAQ 500 Index:

- The Index excludes the financial sector, which has been one of the worst performing sectors over the past 10 years - the NASDAQ Financial 100 Index is down over 30% during that time period.
- Companies covered by the Index are maturing into profitable companies, with earnings growth now outpacing revenue growth.

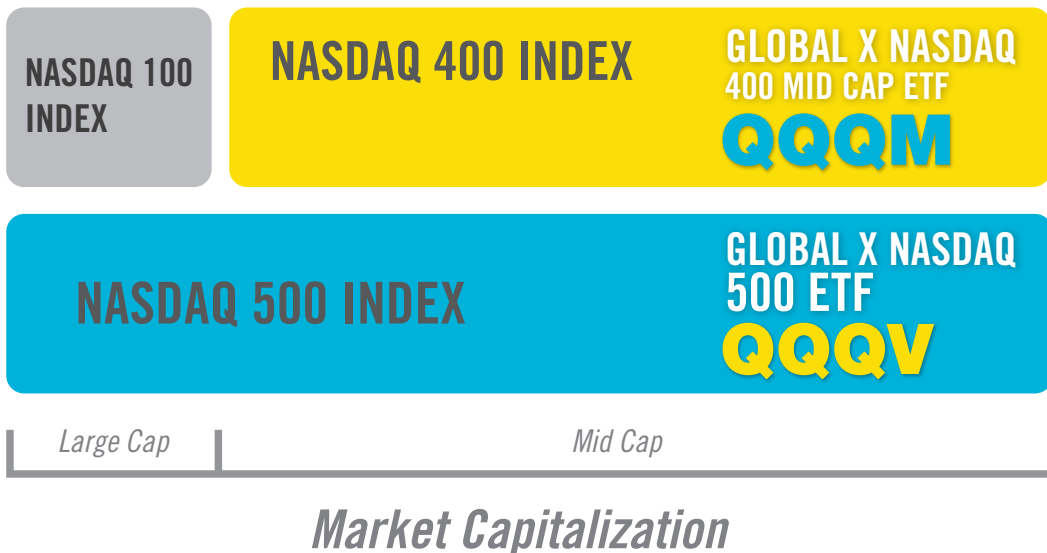

Global X NASDAQ 400 Mid Cap ETF

The Global X NASDAQ 400 Mid Cap ETF tracks the NASDAQ 400 Index, which is designed to measure the performance of 400 mid-capitalization, domestic and international non-financial securities listed on The NASDAQ Stock Market. It is comprised of the next 400 companies after the NASDAQ 100 Index, and provides exposure to a diverse group of industries including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. By targeting the mid cap segment of the NASDAQ market, the Fund provides access to NASDAQ companies that are typically in earlier stages of growth than their large cap counterparts.

About the NASDAQ 400 Index:

- Focus on mid cap segment provides potential opportunity to capture the next high-growth company like Apple or Google.
- The Index excludes the financial sector, which has been one of the worst performing sectors over the past 10 years - the NASDAQ Financial 100 Index is down over 30% during that time period

NASDAQ INDEX STRUCTURE

(Source: NASDAQ 2011)

Investing involves risk, including the possible loss of principal. International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Investments in securities in the Technology sector are subject to rapid changes in technology product cycles; rapid product obsolescence; government regulation; and increased competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Small- and mid-capitalization companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Technology companies and companies that rely heavily on technology tend to be more volatile than the overall market, and are also heavily dependent on patent and intellectual property rights.
