

# The Income Report

In times of economic uncertainty and historically low interest rates in fixed income assets, investors are searching for other sources of income to supplement their portfolios. As with all investments, it is important to diversify among asset classes to help ensure that you are not over-exposed to a single geography, industry, or asset class. To help investors diversify their income sources, we have developed a suite of income-producing ETFs designed to be transparent, cost-effective and seamlessly added to an existing portfolio.

<sup>1</sup> Funds seek investment results that correspond generally to the price and yield performance of their underlying indexes. Index components are determined by the Funds' index providers.

<sup>2</sup> Beta is a measurement of the volatility of a security relative to a market benchmark. A beta less than 1 suggests that the security is less volatile than the market benchmark.

<sup>3</sup> 30-Day SEC Yield as of September 30, 2016. The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. Returns for periods greater than one year are annualized. For performance data current to the most recent month end, please call 1-888-gxfund-1 or visit our website at www.globalxfunds.com.

<sup>1</sup> Distribution Yield: The annual yield an investor would receive if the most recent fund distribution remained the same going forward. The yield represents a single distribution from the fund and does not represent total return of the fund. The distribution yield is calculated by annualizing the most recent distribution and dividing by the NAV.

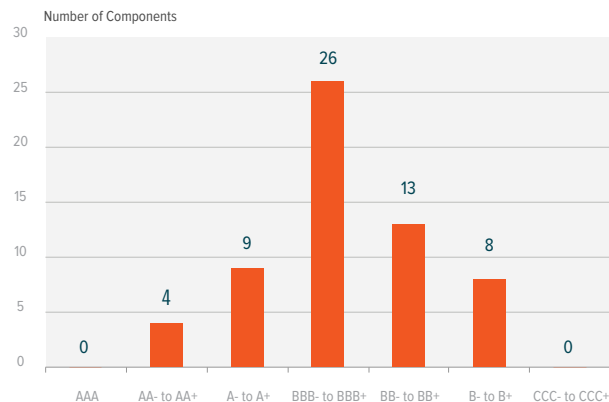

<sup>2</sup> 12-Month Dividend Yield: The yield an investor would have received if they had held the fund over the last twelve months assuming the most recent NAV. The 12-Month yield is calculated by summing any income distributions over the past twelve months and dividing by the NAV.

<sup>3</sup> 30-Day SEC Yield: A standard yield calculation developed by the Securities and Exchange Commission that allows for fairer comparisons among funds. This figure reflects the interest earned during the period after deducting the fund's expenses for the period.

## INDEX DEFINITIONS

SOLSDIV	The Solactive Global SuperDividend Index tracks the performance of 100 equally weighted companies that rank among the highest dividend yielding equity securities in the world.
IDIVT	The INDXX SuperDividend U.S. Low Volatility Index tracks the performance of 50 equally weighted common stocks, MLPs and REITs that rank among the highest dividend yielding equity securities in the United States.
SPPEYT	The S&P Enhanced Yield North American Preferred Stock Index tracks the performance of the highest yielding preferred securities in the United States and Canada.
ISDEMT	The Indxx SuperDividend Emerging Markets Index tracks the performance of 50 equally weighted companies that rank among the highest dividend yielding equity securities in emerging markets, as defined by Indxx. The components of the Underlying Index have paid dividends consistently over the last 2 years.
IALTYT	The Indxx SuperDividend Alternatives Index tracks the performance of a variety of liquid income-generating alternatives including MLPs & Infrastructure Companies, REITs, Private Equity & BDCs, and Closed End Funds focused on Derivative & Fixed Income Strategies. The index components rank among the highest yielding in their asset class, as determined by the Index Provider.
SRET	Solactive Global SuperDividend® REIT Index: The Solactive Global SuperDividend® REIT Index tracks the performance of Real Estate Investment Trusts ("REITs") that rank among the highest yielding REITs globally, as determined by the Index Provider. The Underlying Index is maintained by Solactive AG.

Investing involves risk, including the possible loss of principal. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.

Preferred stock is subject to many of the risks associated with debt securities, including interest rate risk. In addition, preferred stock may not pay a dividend, an issuer may suspend payment of dividends on preferred stock at any time, and in certain situations an issuer may call or redeem its preferred stock or convert it to common stock. High yielding stocks are often speculative, high risk investments. These companies can be paying out more than they can support and may reduce their dividends or stop paying dividends at any time, which could have a material adverse effect on the stock price of these companies and the Fund's performance.

The potential benefits of investing in MLPs depend on them being treated as partnerships for federal income tax purposes. Further, if the MLP is deemed to be a corporation then its income would be subject to federal taxation at the entity level, reducing the amount of cash available for distributions to the fund which could result in a reduction of the fund's value. The risks associated with real estate investment trusts including interest rate risk which may cause certain REIT holdings to decline in value if interest rates increase. REITs are subject to general risks related to real estate including default risk and the possibility of decreasing property values. Diversification does not prevent all investment loss. Real estate is highly sensitive to general and local economic conditions and developments, and characterized by intense competition and periodic overbuilding. Many real estate companies, including REITs, utilize leverage (and some may be highly leveraged), which increases risk and could adversely affect a real estate company's operations and market value in periods of rising interest rates.

ALTY may invest in MLPs, infrastructure investments, REITs, mortgage REITs, convertibles, preferred stocks, senior loans, currency trading, long/short credit, business development companies ("BDCs"), private equity, alternative strategy managed portfolios- and option-writing and therefore may be subject to all underlying risks. ALTY is non-diversified. ALTY may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses.

There is no guarantee that dividends will be paid.

This information is not intended to be individual or personalized investment or tax advice. Please consult a financial advisor or tax professional for more information regarding your tax situation. The fund is required to distribute income and capital gains which may be taxable. Buying and selling shares will result in brokerage commissions and tax consequences. Shares are only available through brokerage accounts which may have minimum requirements. Only whole shares may be purchased.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Global X NAVs are calculated using prices as of 4:00 PM Eastern Time. The market price is the Mid-Point between the Bid and Ask price as of the close of exchange.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. An ETF's market price is the price at which shares in the fund can be bought or sold on the exchanges during trading hours, while the net asset value (NAV) represents the value of each share's portion of the fund's underlying assets and cash at the end of the trading day. The closing price is the Mid-Point between the Bid and Ask price as of the close of exchange. Global X NAVs are calculated using prices as of 4:00 PM Eastern Time. Brokerage commissions will reduce returns.
