

GLOBAL X FUNDS
Global X NASDAQ China Technology ETF (the “Fund”)

Supplement dated November 20, 2018 to the Summary Prospectus,
Statutory Prospectus and Statement of Additional Information (“SAI”)
for the Fund, dated March 1, 2018.

*The information in this Supplement updates information in, and should be read in
conjunction with, the Statutory Prospectus and SAI for the Fund.*

Effective December 5, 2018, the ticker of the Global X NASDAQ China Technology ETF, which will be renamed the Global X MSCI China Communication Services ETF on or around December 5, 2018, will be changed from QQQC to CHIC. As such, all references to the QQQC ticker of the Fund are changed to CHIC.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE

**Important Notice Regarding Change in
ETF Name, Index and Related Matters**

GLOBAL X FUNDS
Global X NASDAQ China Technology ETF (the “Fund”)

Supplement dated September 14, 2018 to the Summary Prospectus,
Statutory Prospectus and Statement of Additional Information (“SAI”)
for the Fund, dated March 1, 2018.

The information in this Supplement updates information in, and should be read in conjunction with, the Summary Prospectus, Statutory Prospectus and SAI for the Fund.

The following changes will take effect for the Fund on or around December 5, 2018.

	Current	New
Fund Name	Global X NASDAQ China Technology ETF	Global X MSCI China Communication Services ETF
Index Name	NASDAQ OMX China Technology Index	MSCI China Communication Services 10/50 Index
Index Components	46	24*
Index Description	The NASDAQ OMX China Technology Index is designed to track the performance of the technology sector in China as defined by The NASDAQ OMX Group, Inc. The NASDAQ OMX China Technology Index is comprised of securities of companies which have their main business operations in the technology sector and generally includes companies whose businesses involve: computer services; internet; software; computer hardware; electronic office equipment; semiconductors; and telecommunications equipment. In order to be eligible for inclusion in the Underlying Index, a company must be domiciled in China or Hong Kong.	The MSCI China Communication Services 10/50 Index (the “Index”) follows a rules-based methodology that is designed to select constituents of the MSCI China Index (the “Parent Index”) that are classified in the communication services sector under the Global Industry Classification System (GICS®). The Parent Index is a free float-adjusted market capitalization-weighted index designed to measure the performance of securities that are classified in China according to the MSCI Global Investable Markets Index Methodology, and that satisfy minimum investability thresholds. The securities eligible for inclusion in the Index include H-Shares, B-Shares, Red Chips, P-Chips, A-Shares that are accessible through the Shanghai-Hong Kong Stock Connect program (“Shanghai Connect”) or the Shenzhen-Hong Kong Stock Connect program (“Shenzhen Connect”, and together with Shanghai Connect, “Stock Connect Programs”), and foreign listings such as American Depository Receipts (“ADRs”). The Index is weighted according to each component’s free-float adjusted market capitalization, but is modified so that, as of the rebalance date, no group entity constitutes more than 10% of the Index and so that, in the aggregate,

		<p>the individual group entities that would represent more than 5% of the Index represent no more than 50% of the Index.</p>
--	--	--

*Index constituents for the MSCI China Communication Services 10/50 Index are as of June 1, 2018. The number of index constituents may change by the effective date (on or around December 5, 2018).

In November 2017, S&P Dow Jones Indices and MSCI Inc. announced changes to the Global Industry Classification Standard (GICS) structure. In particular, the current Telecommunication Services Sector will be broadened and renamed the Communication Services Sector. The Communication Services Sector will include the existing companies classified as Telecommunication Services, as well as certain companies currently classified as either Consumer Discretionary or Information Technology.

The current index is the NASDAQ OMX China Technology Index (the “Current Index”). The Current Index is designed to track the performance of the technology sector in China as defined by The NASDAQ OMX Group, Inc, the provider of the Current Index. The new index is the MSCI China Communication Services 10/50 Index (the “New Index”). The New Index is designed to reflect the performance of securities that are classified in China according to the MSCI Global Investable Markets Index Methodology, that satisfy minimum investability thresholds and that are classified in the communication services sector as per the Global Industry Classification Standard (GICS®). The New Index incorporates all eligible securities as per MSCI’s Global Investable Market Index Methodology, including China A, B and H shares, Red chips, P chips and foreign listings (e.g., American Depository Receipts).

As of the effective date, the following risks are added to the Summary Prospectus and Statutory Prospectus:

Risks Related to Investing in China A-Shares: A-Shares are issued by companies incorporated in mainland China and are traded on Chinese exchanges. Foreign investors can access A-Shares by obtaining a QFII or a RQFII license, as well as through the Stock Connect Programs. The Fund currently intends to gain exposure to A-Shares through the Stock Connect Programs. Investments in A-Shares are subject to various regulations and limits, and the recoupment or repatriation of assets invested in A-Shares is subject to restrictions by the Chinese government. A-Shares may be subject to frequent and widespread trading halts and may become illiquid. These risks, among others, could adversely affect the value of the Fund’s investments.

Risks Related to Stock Connect Programs: The Stock Connect Programs are subject to daily and aggregate quota limitations, which could affect the Fund’s ability to enter into and exit A-Shares positions on a timely basis. The Shenzhen and Shanghai markets may operate when the Stock Connect Programs are not active, and consequently the prices of A-Shares may fluctuate at times when the Fund

is unable to add to or exit its positions. The Stock Connect Programs are new, and the effect of the introduction of large numbers of foreign investors on the market for trading A-Shares is not well understood. Regulations, such as limitations on redemptions or suspension of trading, may adversely impact the value of the Fund's investments. There is no guarantee that the Shenzhen, Shanghai, and Hong Kong Stock Exchanges will continue to support the Stock Connect Programs in the future.

SUPPLEMENT DATED JULY 3, 2018

**TO THE PROSPECTUSES, SUMMARY PROSPECTUSES, AND STATEMENTS OF ADDITIONAL INFORMATION
FOR THE ABOVE SERIES (“FUNDS”) OF THE TRUST, DATED MARCH 1, 2018, AS SUPPLEMENTED FROM TIME
TO TIME**

Capitalized terms and certain other terms used in this supplement, unless otherwise defined in this supplement, have the meanings assigned to the terms in the Prospectuses, Summary Prospectuses, and Statements of Additional Information for the Funds.

On February 12, 2018, Global X Management Company LLC (“Global X”), the Funds’ current investment adviser, entered into an agreement and plan of merger (the “Acquisition Agreement”) pursuant to which MAGI Merger Sub LLC, a direct, wholly-owned subsidiary of Horizons ETFs Management (USA) LLC (“Horizons”) and an indirect, wholly-owned subsidiary of Mirae Asset Global Investments Co., Ltd. (“Mirae”), would be merged with and into Global X (the “Transaction”), subject to certain conditions. Pursuant to the Acquisition Agreement, Horizons acquired all of the equity interests of Global X, and Global X became a direct, wholly-owned subsidiary of Horizons and an indirect, wholly-owned subsidiary of Mirae. In this manner, Global X is ultimately controlled by Mirae. The Transaction closed on July 2, 2018 (such closing date being the “Effective Date”).

Under the Investment Company Act of 1940, as amended (the “1940 Act”), the closing of the Transaction resulted in a change of control of Global X, and the assignment and automatic termination of the Investment Advisory Agreements between the Trust, on behalf of each Fund, and Global X (together, the “Current Advisory Agreements”). Accordingly, on February 23, 2018, the Board of Trustees of the Trust (the “Board”), on behalf of each Fund, at an in-person meeting, approved an interim Investment Advisory Agreement between the Trust, on behalf of the Fund, and Global X (together, the “Interim Advisory Agreements”), pursuant to which Global X may serve as the interim investment adviser to the Fund, subject to certain conditions.

Each Interim Advisory Agreement took effect as of the Effective Date, and will terminate upon the earlier to occur of: (a) 150 calendar days after the Effective Date and the termination of the relevant Current Advisory Agreement; or (b) the approval of a new Investment Advisory Agreement by the shareholders of a Fund (together, the “Proposed Advisory Agreements”). In addition, any advisory fees earned by Global X pursuant to the Interim Advisory Agreements during the term of the Agreements will be held in an interest-bearing escrow account with the Trust’s custodian or a bank.

The Interim Advisory Agreements contain the same terms and conditions as the Current Advisory Agreements, with the exception of the Interim Advisory Agreements’ effective and termination dates and differences in the terms and conditions that the Board, including a majority of the Trustees of the Trust who are not “interested persons,” as that term is defined in the 1940 Act, found to be immaterial.

If a majority of a Fund’s outstanding voting shares do not approve a Fund’s Proposed Advisory Agreement, then Global X, as the interim investment adviser, will be paid out of the escrow account the lesser of (a) any costs in performing the Interim Advisory Agreement (plus interest earned on that amount while in escrow), or (b) the total amount in the escrow account (plus interest earned).

In the event that the Proposed Advisory Agreement is not approved by a Fund's shareholders, the Board will take such actions as the Board believes are in the best interests of the Fund and its shareholders, including, potentially, liquidating the Fund.

March 1, 2018

Global X NASDAQ China Technology ETF
NASDAQ: QQQC

2018 Summary Prospectus

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund (including the Fund's statement of additional information and annual report) online at <http://www.globalxfunds.com/funds/qqqc>. You can also get this information at no cost by calling 1-888-GX-FUND-1 or by sending an e-mail request to info@globalxfunds.com. The Fund's prospectus and statement of additional information, both dated March 1, 2018, as amended and supplemented from time to time, along with the financial statements included in the Fund's most recent annual report to shareholders dated October 31, 2017, are incorporated by reference into (legally made a part of) this Summary Prospectus.

Global X NASDAQ China Technology ETF

Ticker: QQQC Exchange: NASDAQ

INVESTMENT OBJECTIVE

The Global X NASDAQ China Technology ETF ("Fund") seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the NASDAQ OMX China Technology Index ("Underlying Index").

FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares ("Shares") of the Fund. You will also incur usual and customary brokerage commissions when buying and selling Shares.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fees:	0.65%
Distribution and Service (12b-1) Fees:	None
Other Expenses:	0.00%
Total Annual Fund Operating Expenses:	0.65%

Example: The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account customary brokerage commissions that you pay when purchasing or selling Shares of the Fund in the secondary market. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

One Year	Three Years	Five Years	Ten Years
\$66	\$208	\$362	\$810

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 42.59% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund invests at least 80% of its total assets in the securities of the Underlying Index and in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the Underlying Index. The Fund will invest at least 80% of its total assets in securities of technology companies that are economically tied to China. For purposes of this 80% investment policy, technology companies include those engaged in production of technology-related hardware and software, telecommunications, internet, information technology and social media. The Fund's 80% investment policies are non-fundamental and require 60 days prior written notice to shareholders before they can be changed.

The Underlying Index is designed to track the performance of the technology sector in China as defined by The NASDAQ OMX Group, Inc. ("NASDAQ"), the provider of the Underlying Index ("Index Provider"). The Underlying Index is comprised of securities of companies which have their main business operations in the technology sector and generally includes companies whose businesses involve: computer services; internet; software; computer hardware; electronic office equipment; semiconductors; and telecommunications equipment. In order to be eligible for inclusion in the Underlying Index, a company must be domiciled in China or Hong Kong. The Fund's investment objective and Underlying Index may be changed without shareholder approval.

GO PAPERLESS

Sign up now for eDelivery of fund documents from Global X Funds at www.icsdelivery.com

The Underlying Index is sponsored by the Index Provider, which is an organization that is independent of the Fund and Global X Management Company LLC, the investment adviser for the Fund ("Adviser"). The Index Provider determines the relative weightings of the securities in the Underlying Index and publishes information regarding the market value of the Underlying Index.

The Adviser uses a "passive" or indexing approach to try to achieve the Fund's investment objective. Unlike many investment companies, the Fund does not try to outperform the Underlying Index and does not seek temporary defensive positions when markets decline or appear overvalued.

The Fund generally will use a replication strategy. A replication strategy is an indexing strategy that involves investing in the securities of the Underlying Index in approximately the same proportions as in the Underlying Index. However, the Fund may utilize a representative sampling strategy with respect to the Underlying Index when a replication strategy might be detrimental or disadvantageous to shareholders, such as when there are practical difficulties or substantial costs involved in compiling a portfolio of equity securities to replicate the Underlying Index, in instances in which a security in the Underlying Index becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund but not the Underlying Index.

The Adviser expects that, over time, the correlation between the Fund's performance and that of the Underlying Index, before fees and expenses, will exceed 95%. A correlation percentage of 100% would indicate perfect correlation. If the Fund uses a replication strategy, it can be expected to have greater correlation to the Underlying Index than if it uses a representative sampling strategy.

The Fund concentrates its investments (i.e., holds 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Underlying Index is concentrated. As of December 29, 2017, the Underlying Index was concentrated in the information technology sector.

SUMMARY OF PRINCIPAL RISKS

As with any investment, you could lose all or part of your investment in the Fund, and the Fund's performance could trail that of other investments. There is no guarantee that the Fund will achieve its investment objective. The Fund is subject to the principal risks noted below, any of which may adversely affect the Fund's net asset value ("NAV"), trading price, yield, total return and ability to meet its investment objective, as well as other risks that are described in greater detail in the **Additional Information About the Funds** section of this Prospectus and in the Statement of Additional Information ("SAI").

Asian Economic Risk: Decreasing Asian imports, new trade regulations, changes in exchange rates, a recession in Asia or a slowing of economic growth in this region could have an adverse impact on the Chinese economy.

Asset Class Risk: Securities in the Underlying Index or otherwise held in the Fund's portfolio may underperform in comparison to the general securities markets or other asset classes.

Asset Fluctuation Risk: Certain shareholders, including an Authorized Participant, the Adviser or an affiliate of the Adviser, may own a substantial amount of the Fund's Shares. Additionally, from time to time an Authorized Participant, a third party investor, the Adviser, or an affiliate of the Adviser may invest in the Fund and hold its investment for a specific period of time in order to facilitate commencement of the Fund's operations or to allow the Fund to achieve size or scale. Redemptions by large shareholders could have a significant negative impact on the Fund. If a large shareholder were to redeem all, or a large portion, of its shares, there is no guarantee that the Fund will be able to maintain sufficient assets to continue operations in which case the Board of Trustees may determine to liquidate the Fund. In addition, transactions by large shareholders may account for a large percentage of the trading volume on a national securities exchange and may, therefore, have a material upward or downward effect on the market price of the Shares.

Authorized Participant Concentration Risk: The Fund has a limited number of financial institutions that may act as "Authorized Participants" (as defined in the SAI). Only Authorized Participants who have entered into agreements with the Fund's distributor may engage in creation or redemption transactions directly with the Fund. To the extent that those Authorized Participants exit the business or are unable to process creation and/or redemption orders, and no other Authorized Participant is able to step forward to create or redeem in either of those cases, Shares may be more likely to trade at a premium or discount to NAV, and possibly face trading halts and/or delisting from an exchange. Authorized Participant Concentration Risk may be heightened because the Fund invests in non-U.S. securities.

GO PAPERLESS

Sign up now for eDelivery of fund documents
from Global X Funds at www.icسدelivery.com

Concentration Risk: Because the Fund's investments are concentrated in Chinese securities and in the information technology sector, the Fund will be susceptible to loss due to adverse occurrences affecting this country and sector. To the extent that the Underlying Index concentrates in the securities of issuers in a particular country, industry, market, asset class, or sector, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in a country, industry, market, asset class, or sector, the Fund faces more risks than if it were diversified broadly over numerous countries, industries, markets, asset classes, or sectors. Such risks, any of which may adversely affect the companies in which the Fund invests, may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand; competition for resources; adverse labor relations; political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in a particular country, industry, market, asset class, or sector. In addition, at times, such country, industry, market, asset class, or sector may be out of favor and underperform other similar categories or the market as a whole. For additional details on these risks, please see **Risks Related to Investing in China** and **Risks Related to Investing in the Information Technology Sector**.

Currency Risk: Because the Fund's NAV is determined in U.S. dollars, the Fund's NAV could decline if China's currency depreciates against the U.S. dollar or if there are delays or limits on repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund's NAV may change quickly and without warning, which could have a significant negative impact on the Fund.

Custody Risk: Less developed markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by local banks, agents and depositories.

Cyber Security Risk: Failures or breaches of the electronic systems of the Fund, the Adviser, and the Fund's other service providers, market makers, Authorized Participants or the issuers of securities in which the Fund invests have the ability to cause disruptions and negatively impact the Fund's business operations, potentially resulting in financial losses to the Fund and its shareholders. While the Fund has established business continuity plans and risk management systems seeking to address system breaches or failures, there are inherent limitations in such plans and systems. Furthermore, the Fund cannot control the cyber security plans and systems of the Fund's service providers, market makers, Authorized Participants or issuers of securities in which the Fund invests.

Emerging Markets Risk: China is an emerging market country, which may be subject to a greater risk of loss than investments in developed markets. Securities markets of emerging market countries are less liquid, subject to greater price volatility, have smaller market capitalizations, have less government regulation, and are not subject to as extensive and frequent accounting, financial, and other reporting requirements as the securities markets of more developed countries.

Equity Securities Risk: Equity securities are subject to changes in value and their values may be more volatile than other asset classes, as a result of such factors as a company's business performance, investor perceptions, stock market trends and general economic conditions.

European Economic Risk: Decreasing European imports, new trade regulations, changes in exchange rates, a recession in Europe, or a slowing of economic growth in this region could have an adverse impact on the securities in which the Fund invests.

Foreign Securities Risk: The Fund's investments in foreign securities can be riskier than U.S. securities investments. Investments in the securities of foreign issuers (including investments in ADRs and GDRs) are subject to the risks associated with investing in those foreign markets, such as heightened risks of inflation or nationalization. The prices of foreign securities and the prices of U.S. securities have, at times, moved in opposite directions. In addition, securities of foreign issuers may lose value due to political, economic and geographic events affecting a foreign issuer or market. During periods of social, political or economic instability in a country or region, the value of a foreign security traded on U.S. exchanges could be affected by, among other things, increasing price volatility, illiquidity, or the closure of the primary market on which the security (or the security underlying the ADR or GDR) is traded. You may lose money due to political, economic and geographic events affecting a foreign issuer or market.

Geographic Risk: A natural or other disaster could occur in China, which could affect the economy or particular business operations of companies economically tied to China, causing an adverse impact on the Fund's investments in China. China is located in a part of the world that has historically been prone to natural disasters such as floods, droughts, earthquakes, typhoons or tsunamis, and is economically sensitive to environmental events.

Index-Related Risk: There is no guarantee that the Fund will achieve a high degree of correlation to the Underlying Index and therefore achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure

GO PAPERLESS

Sign up now for eDelivery of fund documents
from Global X Funds at www.icسدelivery.com

to the required levels in order to track the Underlying Index. Errors in index data, index computations and/or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

International Closed Market Trading Risk: To the extent that the underlying securities held by the Fund trade on foreign exchanges that may be closed when the securities exchange on which the Fund's Shares trade is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security (i.e., the Fund's quote from the closed foreign market). These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other exchange-traded funds ("ETFs").

Investable Universe of Companies Risk: The investable universe of companies in which the Fund may invest may be limited. If a company no longer meets the Index Provider's criteria for inclusion in the Underlying Index, the Fund may need to reduce or eliminate its holdings in that company. The reduction or elimination of the Fund's holdings in the company may have an adverse impact on the liquidity of the Fund's overall portfolio holdings and on Fund performance.

Issuer Risk: Fund performance depends on the performance of individual companies in which the Fund invests. Changes to the financial condition of any of those companies may cause the value of their securities to decline.

Large-Capitalization Companies Risk: Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

Listing Standards Risk: Under new continuous listing standards adopted by the Fund's listing exchange, the Fund will be required to confirm on an ongoing basis that the components of the Underlying Index satisfy the applicable listing requirements. In the event that the Underlying Index does not comply with the applicable listing requirements, the Fund would be required to rectify such non-compliance by requesting that the Index Provider modify the Underlying Index, adopting a new underlying index, or obtaining relief from the SEC. Failure to rectify such non-compliance may result in the Fund being delisted by the listing exchange.

Management Risk: The Fund is subject to the risk that the Adviser's investment management strategy may cause the Fund to underperform the market or its relevant benchmark or adversely affect the ability of the Fund to achieve its investment objective.

Market Risk: Turbulence in the financial markets and reduced liquidity may negatively affect issuers, which could have an adverse effect on the Fund. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve, or other government actors, which could include increasing interest rates, could cause increased volatility in financial markets and lead to higher levels of Fund redemptions, which could have a negative impact on the Fund. The Fund's NAV could decline over short periods due to short-term market movements and over longer periods during market downturns.

Market Trading Risk: Shares of the Fund are publicly traded on a national securities exchange which may subject shareholders to numerous market trading risks, including the potential lack of an active market for Shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors may lead to the Shares trading at a premium or discount to NAV.

Mid-Capitalization Companies Risk: Mid-capitalization companies may have greater price volatility, lower trading volume and less liquidity than large-capitalization companies. In addition, mid-capitalization companies may have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources and less competitive strength than large-capitalization companies.

Nationalization Risk: Investments in China may be subject to loss due to expropriation or nationalization of assets and property or the imposition of restrictions on foreign investments and repatriation of capital.

Non-Diversification Risk: The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940 ("1940 Act"). As a result, the Fund is subject to the risk that it may be more volatile than a diversified fund because the Fund may invest its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

GO PAPERLESS

Sign up now for eDelivery of fund documents from Global X Funds at www.icdelivery.com

Operational Risk: The Fund is exposed to operational risk arising from a number of factors, including but not limited to human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund and the Adviser seek to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

Passive Investment Risk: The Fund is not actively managed and the Adviser does not attempt to take defensive positions in declining markets. Unlike many investment companies, the Fund does not seek to outperform its Underlying Index. Therefore, it would not necessarily buy or sell a security unless that security is added or removed, respectively, from the Underlying Index, even if that security generally is underperforming. Maintaining investments in securities regardless of market conditions or the performance of individual securities could cause the Fund's return to be lower than if the Fund employed an active strategy.

Premium/Discount Risk: Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

Privatization Risk: China has privatized, or has begun the process of privatizing, certain entities and industries. Privatized entities may lose money or be re-nationalized.

Reliance on Trading Partners Risk: The Fund invests in the Chinese economy, which is heavily dependent upon trading with key partners. Any reduction in this trading, including as a result of adverse economic conditions in a trading partner's economy, may cause an adverse impact on the Chinese economy in which the Fund invests. Through its portfolio companies' trading partners, the Fund is specifically exposed to **Asian Economic Risk, European Economic Risk, and U.S. Economic Risk.**

Risks Related to Investing in China: Investment exposure to China subjects the Fund to risks specific to China. China may be subject to considerable degrees of economic, political and social instability. China is an emerging market and demonstrates significantly higher volatility from time to time in comparison to developed markets. Over the past 25 years, the Chinese government has undertaken reform of economic and market practices and expansion of the sphere for private ownership of property in China. However, Chinese markets generally continue to experience inefficiency, volatility and pricing anomalies resulting from governmental influence, a lack of publicly available information and/or political and social instability. Internal social unrest or confrontations with other neighboring countries, including military conflicts in response to such events, may also disrupt economic development in China and result in a greater risk of currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation. Export growth continues to be a major driver of China's rapid economic growth. Reduction in spending on Chinese products and services, institution of tariffs or other trade barriers, or a downturn in any of the economies of China's key trading partners may have an adverse impact on the Chinese economy. The recent presidential election in the U.S. may have increased the probability of new trade regulations and other protective trade measures being implemented in relation to China. While policy implications remain uncertain, new regulations or trade barriers could lead to a decrease in trade activity between China and the U.S., which could have an adverse impact on the Chinese economy. China has implemented a number of tax reforms in recent years, and may amend or revise its existing tax laws and/or procedures in the future, possibly with retroactive effect. Changes in applicable Chinese tax law could reduce the after-tax profits of the Fund, directly or indirectly, including by reducing the after-tax profits of companies in China in which the Fund invests. Uncertainties in Chinese tax rules could result in unexpected tax liabilities for the Fund.

Risks Related to Investing in the Information Technology Sector: Companies in the technology sector are subject to rapid changes in technology product cycles; rapid product obsolescence; government regulation; and increased competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Technology companies and companies that rely heavily on technology tend to be more volatile than the overall market, and are also heavily dependent on patent and intellectual property rights. In addition, technology companies may have limited product lines, markets, financial resources or personnel.

Small-Capitalization Companies Risk: Compared to mid- and large-capitalization companies, small-capitalization companies may be less stable and more susceptible to adverse developments, and their securities may be more volatile and less liquid.

Tracking Error Risk: Tracking error is the divergence of the Fund's performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the Fund's portfolio and those included in the Underlying Index, pricing differences (including differences between a security's price at the local market close and the Fund's valuation of a security at the time of calculation of the Fund's NAV), differences in transaction costs, the Fund's holding of uninvested cash, differences in timing of the accrual of

or the valuation of dividends or interest, tax gains or losses, changes to the Underlying Index or the costs to the Fund of complying with various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Underlying Index does not. ETFs that track indices with significant weight in emerging markets issuers may experience higher tracking error other than other ETFs that do not track such indices.

Trading Halt Risk: An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

U.S. Economic Risk: A decrease in U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates or an economic slowdown in the United States may have an adverse impact on China's economy and, as a result, securities to which the Fund has exposure.

Valuation Risk: The sales price the Fund could receive for a security may differ from the Fund's valuation of the security and may differ from the value used by the Underlying Index, particularly for securities that trade in low value or volatile markets or that are valued using a fair value methodology. The value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's Shares.

PERFORMANCE INFORMATION

The bar chart and table that follow show how the Fund performed on a calendar year basis and provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for the indicated periods compare with the Fund's benchmark index and a broad measure of market performance. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.globalxfunds.com.

Annual Total Returns (Years Ended December 31)

Best Quarter: 09/30/13 26.64%
Worst Quarter: 09/30/15 -26.89%

Average Annual Total Returns (for the Periods Ended December 31, 2017)

	One Year Ended December 31, 2017	Five Years Ended December 31, 2017	Since Inception (12/08/2009)
Global X NASDAQ China Technology ETF:			
·Return before taxes	46.78%	18.74%	10.85%
·Return after taxes on distributions ¹	45.50%	18.06%	10.39%
·Return after taxes on distributions and sale of Fund Shares ¹	26.57%	14.93%	8.66%
Hybrid NASDAQ OMX China Technology Index (net)² (Index returns reflect invested dividends net of withholding taxes, but reflects no deduction for fees, expenses, or other taxes)	49.30%	20.12%	11.79%
MSCI Emerging Markets Index (net) (Index returns reflect invested dividends net of withholding taxes, but reflects no deduction for fees, expenses, or other taxes)	37.28%	4.35%	4.71%

¹ After-tax returns are calculated using the historical highest individual U.S. federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown above. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (IRAs).

² Hybrid Index performance reflects the performance of the Solactive China Technology Index through December 13, 2011 and the NASDAQ OMX China Technology Index thereafter.

FUND MANAGEMENT

Investment Adviser: Global X Management Company LLC.

Portfolio Managers: The professionals primarily responsible for the day-to-day management of the Fund are Chang Kim, CFA, James Ong, CFA, Hailey Harris, and Nam To ("Portfolio Managers"). Mr. Kim has been a Portfolio Manager of the Fund since February 15, 2014. Mr. Ong and Ms. Harris have been Portfolio Managers of the Fund since March 1, 2016. Mr. To has been a Portfolio Manager of the Fund since March 1, 2018.

PURCHASE AND SALE OF FUND SHARES

Shares of the Fund are listed and traded at market prices on a national securities exchange. Shares may only be purchased and sold on the exchange through a broker-dealer. The price of Shares is based on market price, and because ETF shares trade at market prices rather than at NAV, Shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). Only "Authorized Participants" (as defined in the SAI) who have entered into agreements with the Fund's distributor, SEI Investments Distribution Co. ("Distributor"), may engage in creation or redemption transactions directly with the Fund. The Fund will only issue or redeem Shares that have been aggregated into blocks of 50,000 Shares or multiples thereof ("Creation Units"). The Fund will issue or redeem Creation Units in return for a basket of cash and/or securities that the Fund specifies any day that the national securities exchanges are open for business ("Business Day").

TAX INFORMATION

The Fund intends to make distributions that may be taxable to you as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account ("IRA"), in which case distributions from such tax-deferred arrangement, may be taxable to you.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Adviser and its related companies may pay broker/dealers or other financial intermediaries (such as a bank) for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing your broker/dealer, sales persons or other intermediary or its employees or associated persons to recommend a Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
