**Global X Social Media ETF**  
NASDAQ: SOCL

**2017 Summary Prospectus**

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund (including the Fund's statement of additional information and annual report) online at <http://www.globalxfunds.com/funds/socl>. You can also get this information at no cost by calling 1-888-GX-FUND-1 or by sending an e-mail request to [info@globalxfunds.com](mailto:info@globalxfunds.com). The Fund's prospectus and statement of additional information, both dated March 1, 2017, as amended and supplemented from time to time, along with the financial statements included in the Fund's most recent annual report to shareholders dated October 31, 2016, are incorporated by reference into (legally made a part of) this Summary Prospectus.

# Global X Social Media ETF

Ticker: SOCL Exchange: NASDAQ

## INVESTMENT OBJECTIVE

The Global X Social Media ETF (formerly, Global X Social Media Index ETF) ("Fund") seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Solactive Social Media Total Return Index ("Underlying Index").

## FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy and hold shares ("Shares") of the Fund. You will also incur usual and customary brokerage commissions when buying and selling Shares.

**Annual Fund Operating Expenses** (expenses that you pay each year as a percentage of the value of your investment):

Management Fees:	0.65%
Distribution and Service (12b-1) Fees:	None
Other Expenses:	0.00%
<b>Total Annual Fund Operating Expenses:</b>	<b>0.65%</b>

**Example:** The following example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account customary brokerage commissions that you pay when purchasing or selling Shares of the Fund in the secondary market. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

One Year	Three Years	Five Years	Ten Years
\$66	\$208	\$362	\$810

**Portfolio Turnover:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 39.89% of the average value of the portfolio.

## PRINCIPAL INVESTMENT STRATEGIES

The Fund will invest at least 80% of its total assets in the securities of the Underlying Index and in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the Underlying Index. The Fund's 80% investment policy is non-fundamental and requires 60 days' prior written notice to shareholders before it can be changed. The Fund may lend securities representing up to one-third of the value of the Fund's total assets (including the value of the collateral received).

The Underlying Index tracks the equity performance of the largest and most liquid companies involved in the social media industry, including companies that provide social networking, file sharing, and other web-based media applications, as defined by Solactive AG, the provider of the Underlying Index ("Index Provider"). As of December 30, 2016, the Underlying Index had 32 constituents, 18 of which are foreign companies. The Fund's investment objective and Underlying Index may be changed without shareholder approval.

The Underlying Index is sponsored by the Index Provider, which is an organization that is independent of the Fund and Global X Management Company LLC, the investment adviser for the Fund ("Adviser"). The Index Provider determines the relative weightings of the securities in the Underlying Index and publishes information regarding the market value of the Underlying Index.

The Adviser uses a “passive” or indexing approach to try to achieve the Fund’s investment objective. Unlike many investment companies, the Fund does not try to outperform the Underlying Index and does not seek temporary defensive positions when markets decline or appear overvalued.

The Fund generally will use a replication strategy. A replication strategy is an indexing strategy that involves investing in the securities of the Underlying Index in approximately the same proportions as in the Underlying Index. However, the Fund may utilize a representative sampling strategy with respect to the Underlying Index when a replication strategy might be detrimental or disadvantageous to shareholders, such as when there are practical difficulties or substantial costs involved in compiling a portfolio of equity securities to replicate the Underlying Index, in instances in which a security in the Underlying Index becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations (such as tax diversification requirements) that apply to the Fund but not the Underlying Index.

The Adviser expects that, over time, the correlation between the Fund’s performance and that of the Underlying Index, before fees and expenses, will exceed 95%. A correlation percentage of 100% would indicate perfect correlation. If the Fund uses a replication strategy, it can be expected to have greater correlation to the Underlying Index than if it uses a representative sampling strategy.

The Fund concentrates its investments (*i.e.*, holds 25% or more of its total assets) in a particular industry or group of industries to approximately the same extent that the Underlying Index is concentrated. As of December 30, 2016, the Underlying Index was concentrated in the Information Technology sector.

## SUMMARY OF PRINCIPAL RISKS

As with any investment, you could lose all or part of your investment in the Fund, and the Fund's performance could trail that of other investments. There is no guarantee that the Fund will achieve its investment objective. The Fund is subject to the principal risks noted below, any of which may adversely affect the Fund's net asset value ("NAV"), trading price, yield, total return and ability to meet its investment objective, as well as other risks that are described in greater detail in the **Additional Information About the Funds** section of the Prospectus and in the Statement of Additional Information ("SAI").

**Asian Economic Risk:** Investments in Asian markets involve risks not typically associated with investments in securities of issuers in more developed countries, which may negatively affect the value of your investment in the Fund. The countries in Asia present different economic and political conditions from those in Western markets, and less social, political and economic stability. Political instability could have an adverse effect on economic or social conditions in these economies and may result in outbreaks of civil unrest, terrorist attacks or threats or acts of war in the affected areas, any of which could materially and adversely affect the companies in which the Fund may invest.

**Asset Class Risk:** Securities in the Underlying Index or otherwise held in the Fund's portfolio may underperform in comparison to the general securities markets or other asset classes.

**Authorized Participant Concentration Risk:** The Fund has a limited number of financial institutions that may act as Authorized Participants. Only Authorized Participants who have entered into agreements with the Fund’s distributor may engage in creation or redemption transactions directly with the Fund. To the extent that those Authorized Participants exit the business or are unable to process creation and/or redemption orders, and no other Authorized Participant is able to step forward to create or redeem in either of those cases, Shares may be more likely to trade at a premium or discount to NAV, and possibly face trading halts and/or delisting from an exchange. The Authorized Participant Concentration Risk may be heightened because the Fund invests in non-U.S. securities.

**Concentration Risk:** Because the Fund's investments are concentrated in the information technology sector, the Fund will be susceptible to loss due to adverse occurrences affecting this sector. To the extent that the Underlying Index concentrates in the securities of issuers in a particular country, industry, market, asset class, or sector, the Fund will also concentrate its investments to approximately the same extent. By concentrating its investments in a country, industry, market, asset class, or sector, the Fund faces more risks than if it were diversified broadly over numerous countries, industries, markets, asset classes, or sectors. Such risks, any of which may adversely affect the companies in which the Fund invests, may include, but are not limited to, the following: general economic conditions or cyclical market patterns that could negatively affect supply and demand; competition for resources, adverse labor relations, political or world events; obsolescence of technologies; and increased competition or new product introductions that may affect the profitability or viability of companies in a particular country, industry, market, asset class, or sector. In addition, at times, such country, industry, market, asset class, or sector may be out of favor and underperform other similar categories or the market as a whole. For additional details on these risks, please see **Risks Related to Investing in the Information Technology Sector**.

**Currency Risk:** The Fund may invest in securities denominated in foreign currencies. Because the Fund's NAV is determined in U.S. dollars, the Fund's NAV could decline if currencies of the underlying securities depreciate against the U.S. dollar or if there are delays or limits on repatriation of such currency. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the Fund's NAV may change quickly and without warning, which could have a significant negative impact on the Fund.

**Custody Risk:** Less developed markets are more likely to experience problems with the clearing and settling of trades and the holding of securities by local banks, agents and depositories.

**Emerging Market Risk:** The Fund is expected to invest in securities in emerging market countries, currently including China and Taiwan, a list that might be expanded as the Underlying Index rebalances over time. The Fund's investment in an emerging market country may be subject to a greater risk of loss than investments in developed markets. Because certain securities markets in the emerging countries in which the Fund may invest are small in size, underdeveloped and are less regulated and less correlated to global economic cycles than those markets located in more developed countries, the securities markets in such countries are subject to greater risks associated with market volatility, lower market capitalization, lower trading volume, illiquidity, inflation, greater price fluctuations and uncertainty regarding the existence of trading markets.

**Equity Securities Risk:** Equity securities are subject to changes in value and their values may be more volatile than other asset classes, as a result of such factors as a company's business performance, investor perceptions, stock market trends and general economic conditions.

**Foreign Securities Risk:** The Fund's investments in foreign securities can be riskier than U.S. securities investments. Investments in the securities of foreign issuers (including investments in ADRs and GDRs) are subject to the risks associated with investing in those foreign markets, such as heightened risks of inflation or nationalization. The prices of foreign securities and the prices of U.S. securities have, at times, moved in opposite directions. In addition, securities of foreign issuers may lose value due to political, economic and geographic events affecting a foreign issuer or market. During periods of social, political or economic instability in a country or region, the value of a foreign security traded on U.S. exchanges, nonetheless, could be affected by, among other things, increasing price volatility, illiquidity, or the closure of the primary market on which the security (or the security underlying the ADR or GDR) is traded. You may lose money due to political, economic and geographic events affecting a foreign issuer or market.

**Geographic Risk:** A natural or other disaster could occur in a geographic region in which the Fund invests, which could affect the economy or particular business operations of companies in the specific geographic region, causing an adverse impact on the Fund's investments in the affected region.

**Index-Related Risk:** There is no guarantee that the Fund will achieve a high degree of correlation to the Underlying Index and therefore achieve its investment objective. Market disruptions and regulatory restrictions could have an adverse effect on the Fund's ability to adjust its exposure to the required levels in order to track the Underlying Index. Errors in index data, index computations and/or the construction of the Underlying Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

**International Closed Market Trading Risk:** To the extent that the underlying securities held by the Fund trade on foreign exchanges that may be closed when the securities exchange on which the Fund's Shares trade is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security (i.e., the Fund's quote from the closed foreign market). These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other exchange-traded funds.

**Investable Universe of Companies Risk:** The investable universe of companies in which the Fund may invest may be limited. If a company no longer meets the Index Provider's criteria for inclusion in the Underlying Index, the Fund may need to reduce or eliminate its holdings in that company. The reduction or elimination of the Fund's holdings in the company may have an adverse impact on the liquidity of the Fund's overall portfolio holdings and on Fund performance.

**Issuer Risk:** Fund performance depends on the performance of individual companies in which the Fund invests. Changes to the financial condition of any of those companies may cause the value of their securities to decline.

**Large-Capitalization Companies Risk:** Large-capitalization companies may trail the returns of the overall stock market. Large-capitalization stocks tend to go through cycles of doing better - or worse - than the stock market in general. These periods have, in the past, lasted for as long as several years.

**Management Risk:** The Fund is subject to the risk that the Adviser's investment management strategy may cause the Fund to underperform the market or its relevant benchmark or adversely affect the ability of the Fund to achieve its investment objective.

**Market Risk:** Turbulence in the financial markets and reduced liquidity may negatively affect issuers, which could have an adverse effect on the Fund. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve, or other government actors, which could include increasing interest rates, could cause increased volatility in financial markets and lead to higher levels of Fund redemptions, which could have a negative impact on the Fund. The Fund's NAV could decline over short periods due to short-term market movements and over longer periods during market downturns.

**Market Trading Risk:** The Fund faces numerous market trading risks, including the potential lack of an active market for Shares, losses from trading in secondary markets, periods of high volatility and disruption in the creation/redemption process of the Fund. Any of these factors may lead to the Shares trading at a premium or discount to NAV.

**Mid-Capitalization Companies Risk:** Mid-capitalization companies may have greater price volatility, lower trading volume and less liquidity than large-capitalization companies. In addition, mid-capitalization companies may have smaller revenues, narrower product lines, less management depth and experience, smaller shares of their product or service markets, fewer financial resources and less competitive strength than large-capitalization companies.

**Non-Diversification Risk:** The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940 ("1940 Act"). As a result, the Fund is subject to the risk that it will be more volatile than a diversified fund because the Fund may invest its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

**Passive Investment Risk:** The Fund is not actively managed and the Adviser does not attempt to take defensive positions in declining markets. Unlike many investment companies, the Fund does not utilize an investing strategy that seeks returns in excess of its Underlying Index. Therefore, it would not necessarily buy or sell a security unless that security is added or removed, respectively, from the Underlying Index, even if that security generally is underperforming. Maintaining investments in securities regardless of market conditions or the performance of individual securities could cause the Fund's return to be lower than if the Fund employed an active strategy.

**Premium/Discount Risk:** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Risks Related to Investing in the Information Technology Sector:** Companies in the technology sector are subject to rapid changes in technology product cycles; rapid product obsolescence; government regulation; and increased competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Technology companies and companies that rely heavily on technology tend to be more volatile than the overall market, and are also heavily dependent on patent and intellectual property rights. In addition, technology companies may have limited product lines, markets, financial resources or personnel.

**Risks Related to Investing in the Social Media Industry:** The Fund invests in securities of companies engaged in the social media industry, including companies that provide social networking, file sharing, and other web-based media applications. The risks related to investing in such companies include disruption in service caused by hardware or software failure, interruptions or delays in service by third-party data center hosting facilities and maintenance providers, security breaches involving certain private, sensitive, proprietary and confidential information managed and transmitted by social media companies, and privacy concerns and laws, evolving Internet regulation and other foreign or domestic regulations that may limit or otherwise affect the operations of such companies. Furthermore, the business models employed by the companies in the social media industry may not prove to be successful.

**Securities Lending Risk:** Securities lending involves a risk of loss because the borrower may fail to return the securities in a timely manner or at all. If the Fund is not able to recover the securities loaned, it may sell the collateral and purchase a replacement security in the market. Lending securities entails a risk of loss to the Fund if and to the extent that the market value of the loaned securities increases and the collateral is not increased accordingly. Additionally, the Fund will bear any loss on the investment of cash collateral it receives. These events could also trigger adverse tax consequences for the Fund. As securities on loan may not be voted by the Fund, there is a risk that the Fund may not be able to recall the securities in sufficient time to vote on material proxy matters.

**Tracking Error Risk:** Tracking error is the divergence of the Fund's performance from that of the Underlying Index. Tracking error may occur because of differences between the securities and other instruments held in the Fund's portfolio and those included in the Underlying Index, pricing differences (including differences between a security's price at the local market close and the Fund's valuation of a security at the time of calculation of the Fund's NAV), differences in transaction costs, the Fund's holding of uninvested cash, differences in timing of the accrual of or the valuation of dividends or interest, tax gains or losses, changes to the Underlying Index or the costs to the Fund of complying with various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the Underlying Index does not. Index ETFs that are track indices with significant weight in emerging markets issuers may experience higher tracking error other than other index ETFs that do not track such indices.

**Trading Halt Risk:** An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

**U.S. Economic Risk:** Decreasing U.S. imports, new trade regulations, changes in the U.S. dollar exchange rates, a recession in the United States or continued increases in foreclosures rates may have an adverse impact on the Fund.

**Valuation Risk:** The sales price the Fund could receive for a security may differ from the Fund's valuation of the security and may differ from the value used by the Underlying Index, particularly for securities that trade in low value or volatile markets or that are valued using a fair value methodology. The value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's Shares.

## PERFORMANCE INFORMATION

The bar chart and table that follow show how the Fund performed on a calendar year basis and provide an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual returns for the indicated periods compare with the Fund's benchmark index and a broad measure of market performance. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at [www.globalxfunds.com](http://www.globalxfunds.com).

### Annual Total Returns (Years Ended December 31)

**Best Quarter:** 09/30/13 31.33%  
**Worst Quarter:** 12/31/16 -13.58%

### Average Annual Total Returns (for the Periods Ended December 31, 2016)

	One Year Ended December 31, 2016	Five Years Ended December 31, 2016	Since Inception (11/14/2011)
<b>Global X Social Media ETF:</b>			
·Return before taxes	8.71%	10.88%	7.76%
·Return after taxes on distributions <sup>1</sup>	8.65%	10.83%	7.72%
·Return after taxes on distributions and sale of Fund Shares <sup>1</sup>	4.95%	8.66%	6.11%
<b>Solactive Social Media Total Return Index (net)</b> (Index returns do not reflect deductions for fees, expenses, or taxes)	9.55%	11.53%	8.33%
<b>S&amp;P 500 Index</b> (Index returns do not reflect deductions for fees, expenses, or taxes)	11.96%	14.66%	14.43%
<b>MSCI ACWI Index (net)<sup>2</sup></b> (Index returns do not reflect deductions for fees, expenses, or taxes)	7.86%	9.36%	8.79%

<sup>1</sup> After-tax returns are calculated using the historical highest individual U.S. federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown above. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (IRAs).

<sup>2</sup> As of March 1, 2017, the Fund changed its broad based benchmark from the S&P 500 Index to the MSCI ACWI Index. The new benchmark is a more appropriate comparison for the Fund.

## FUND MANAGEMENT

**Investment Adviser:** Global X Management Company LLC.

**Portfolio Managers:** The professionals primarily responsible for the day-to-day management of the Fund are Luis Berruga, Chang Kim, CFA, James Ong and Hailey Harris ("Portfolio Managers"). Messrs. Berruga and Kim have been Portfolio Managers of the Fund since February 15, 2014. Mr. Ong and Ms. Harris have been Portfolio Managers of the Fund since March 1, 2016.

## PURCHASE AND SALE OF FUND SHARES

Shares of the Fund are listed and traded at market prices on a national securities exchange. Shares may only be purchased and sold on the exchange through a broker-dealer. The price of Shares is based on market price, and because ETF shares trade at market prices rather than at NAV, Shares may trade at a price greater than NAV (a premium) or less than NAV (a discount). Only "Authorized Participants" (as defined in the SAI) who have entered into agreements with the Funds' distributor, SEI Investments Distribution Co. ("Distributor"), may engage in creation or redemption transactions directly with a Fund. The Funds will only issue or redeem Shares that have been aggregated into blocks of 50,000 Shares or multiples thereof ("Creation Units"). The Funds will issue or redeem Creation Units in return for a basket of cash and/or securities that the Fund specifies each Business Day.

## TAX INFORMATION

The Fund intends to make distributions that may be taxable to you as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account ("IRA"), in which case distributions from such tax-deferred arrangement, may be taxable to you.

## PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Adviser and its related companies may pay broker/dealers or other financial intermediaries (such as a bank) for the sale of Fund Shares and related services. These payments may create a conflict of interest by influencing your broker/dealer, sales persons or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
